

# FORMED TUBING

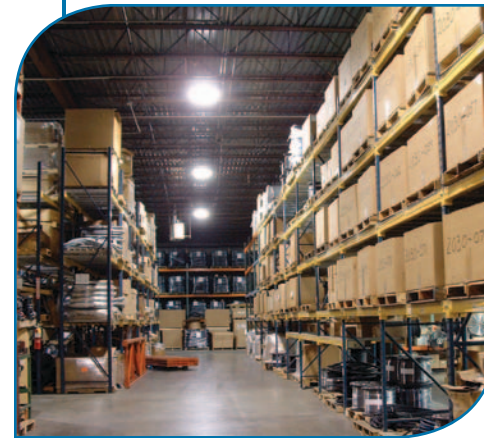

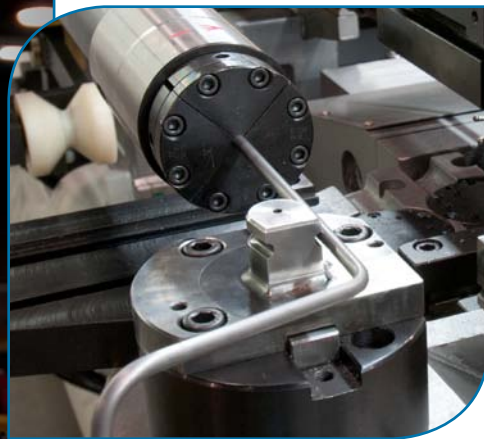

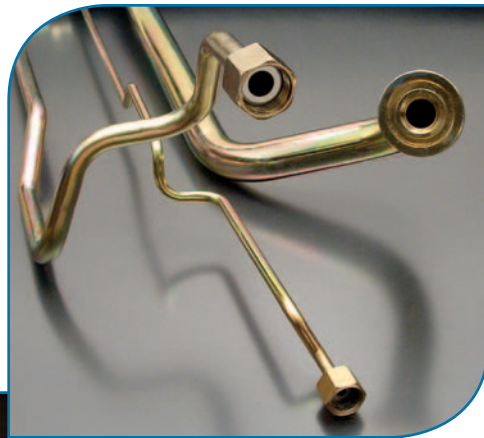

**INNOVATIVE FORMED TUBING SOLUTIONS**

**AN ISO 9001:2000 COMPANY**

## ***Our Experience is Your Advantage***

At MFC we are committed to working with our customers on designing the right products for their applications, producing products that meet their quality expectations, and servicing them throughout the process. We hope you will give us the opportunity to prove that our experience does make a difference.

## ***Let Our Quality Products Give You an Advantage***

Building quality products at competitive prices was our mission statement when MFC was founded in 1969. Over the last four decades our focus on this goal has only intensified. Today, MFC is proud to be certified as an ISO 9001: 2000 company. However, MFC's insistence on building quality products doesn't end with this achievement. Our entire staff plays an important role in continuing to look for areas to improve our quality system so our customers can be assured that they receive quality products today and into the future.

## ***Utilize our Service Advantage***

At MFC, we don't feel that servicing our customers is a job isolated to our customer care representatives. Our entire team of professionals is charged with creating an environment that makes working with MFC an enjoyable experience. Although our sales staff acts as the liaison, it is the efforts of the rest of the team that allows MFC to provide exceptional service to all of our customers. Whether your service requirement is as simple as expediting an order or as complex as designing a custom product, MFC is capable of meeting the challenge.
